

## CLAIMS

1. A process for imparting a wood grain to a textured surface having a pattern of texture surfaces with recesses therein, comprising:
  - applying base coat comprising an opaque, pigmented, water-based paint/stain emulsion to a wood-grain textured substrate;
  - drying the base coat;
  - sparingly applying a pigmented, water-based graining coat in an amount sufficient to color at least a majority of texture recesses in the substrate; and
  - air drying the graining coat.
2. A process according to claim 1, wherein the graining coat is applied by spraying at a rate of from about 1 to 3 ounces per 32 square feet of surface.
3. A process according to claim 1, wherein the graining coat comprises a self-crosslinked urethane/acrylic hybrid.
4. A kit for imparting a wood grain to a textured surface having a pattern of texture surfaces with recesses therein, comprising:
  - an opaque, pigmented, water-based paint/stain emulsion; and
  - a pigmented, water-based graining coat emulsion packaged in a spray bottle

and, instructions in accord with claim 1.
5. A kit according to claim 4 which further includes a scraper, brush and/or cloth.
6. A kit according to claim 4, wherein the graining coat comprises a urethane/acrylic hybrid.
